

April 2015 meeting:

Our meeting was held on April 16th.

Paul N9QYK brought some of his AM FM radios. He told us about how he purchased them and how he was driving around the neighborhood and found some on top of people's garbage cans that were being thrown out. Paul picked them up and would repair them and they now work. His hobby is not Ham radio but old and antique radios too. Thanks Paul for your time and effort.

Levi WB9COA also gave a presentation on how to and why you should have your electronics grounded. Levi also donated some stamps to the club. Thanks Levi.

Next month the meeting will be held one week earlier on May 14th. Due to scheduling at the library we had to pick this date. Hope to see everyone there.
