

The Starke County Amateur Radio Club July meeting was called to order at 7:00 pm on the 19th. We had 11 members and one guests.

Old business:

John, W3ML discuss the business he had with the tower climber. Nate Greeeling is now doing tower work after his regular job. He is just starting to do Ham antennas so will take him while to get used to it.

He did a great job of putting new coax on my beam. To reach him Nate just call and after it rings for awhile you will go to voice mail. Leave him a message that you have a tower and antenna work that you would like to talk to him about, leave your number. He will get back to you in a day or two.

He usually does the work in the evening after he gets off. Around 5:30 to 7:00.

You just have to explain nicely what you want done so he understands it. As I said he has not work much on ham antennas.

His number is 260-377-9112

New Business:

Treasurer Report was given by John W3MI. We have \$1099.90.

Chester Ka9FAW said that the repeater sounded grabbed. John said it may be that people are holding their mics to close to their mouths. He advised that we need to make sure to hold them farther away

Chester was also having problems with FLDigi, but no one there could help as they didn't use the program. Levi said he had some files on it and would send them to Chester.

Linda mentioned that NASA on the Air was going on until the end of the year.

David, KC8OBH said that Lenny won the last Foxhunt. Next is August 19th. See website for details.

Presentation John, W3ML showed a video on how to make a 6 meter dipole.

Raffle brought in \$4.00.

Meeting was adjourned at 8:07 pm.

Respectfully submitted,

John, W3ML Secretary/Treasurer
